

The purpose of the project idea is to develop a platform where Ukrainian refugees can ask for help to locals through a forum-like website. This website will operate within the Swiss border, as Swiss citizens should provide answers and support on local matters. The platform will be segmented into two different sections: one dedicated to administrative questions and the other to meet people.

Within the administrative section, the website will be segmented in six categories to allow Ukrainian citizens to focus their questions on a specific field of interest, namely:

- Accommodation
- Insurance
- S Permit
- Small jobs
- Document translation
- Other

The aim is to answer the most urgent questions, as well as favor integration between these two groups. By asking questions to the locals directly, we believe that we will create a sense of community and allow Swiss citizens to socially engage in the current situation by simply answering questions. These five sections also intend to organize the forum, as we believe that it will allow for targeted research and facilitate communication between the two parties.

The second section of the platform will be based on the forum functionality but to meet people instead. It is important that Ukrainian refugees have the chance to meet both the locals and other Ukrainian citizens who had to flee the country. This is especially important for people who had to leave on their own or for the ones who would like to find people sharing the same situation, in order to support each other. The goal of this section is to create a community and a feeling of belonging in this country.

The Meet up section will be segmented between six major cities in Switzerland, in order to focus the search:

- Zürich
- Basel
- Bern
- Geneva
- Lausanne

- Lugano

We hope that this platform allows for a good integration between Ukrainian and Swiss citizens, as well as facilitate communication between them. We hope that this support tool will help to fight loneliness for people who had to flee the war on their own and give them the opportunity to meet other Ukrainians who went through the same situation.
